

Cookie policy

For a website to work properly and to be improved in order to make your browsing experience better, a minimal amount of information (cookies) needs to be stored on your computer when you visit the site. More than 90% of all websites use cookies. Under the EU rules, they are required to request user consent to do so. By using this website, you agree to the use of cookies. Blocking the cookies allows you to view the page, but some of its features will not be functional.

What is a cookie?

The cookie information is saved on your computer by the website you visit. Cookies usually save your website browsing settings, such as your preferred language or address. Later, when you open a certain web page again, the internet browser sends back the cookies that belong to that page. This allows the page to display information tailored to your requirements.

Cookies can store a wide range of information including personal information (such as your name or e-mail address). However, this information can only be saved if you enable it — the website cannot gain access to information that you have not provided, and cannot access other files on your computer or mobile device. To you, the default activity of saving and sending cookies is not visible; nevertheless, you can change your Internet browser settings so that you can choose for yourself whether to approve or reject cookie requests, delete cookies automatically when you close your browser, etc.

How to disable cookies?

By turning off cookies, you decide whether you want to allow cookies to be stored on your computer or mobile device, or not. Cookie settings can be controlled and configured in your Internet browser. If you disable cookies, you may not be able to use some of the functionality of a visited website.

What are temporary cookies?

Temporary cookies, or session cookies, are removed from your computer when you close your browser. Websites use them to store temporary information, such as items in a shopping cart.

What are permanent cookies?

Permanent or saved cookies remain on your computer after you close the Internet browser. Websites use them to store information such as login name and password, so you do not have to sign in for each visit to a specific location. Permanent cookies will remain on your computer for days, months, even years.

What are first-party cookies?

First-party cookies come from the domains of the sites you are visiting. They can be permanent or temporary. With these cookies, a site can store the data it will use when you visit it again the next time.

What are third-party cookies?

Third-party cookies come from ads (such as pop-up or other ads) that appear on the site you are visiting; however, they are placed by other domains. With these cookies, other websites can track your use of the Internet for marketing purposes.

Does this website use cookies?

Yes, with the primary goal of making your experience of our website better.

What kind of cookies does this website use and why

Session cookies — which expire (and are automatically deleted) when you close the Internet browser. We use "session cookies" to enhance the user experience during your visit.

Persistent cookies — which usually have the expiration date far in the future and will stay in your browser until they expire or until you manually delete them. We use permanent cookies to understand the habits of the user better, so that we can improve our website guided by your habits. However, it is not possible to identify you as a user based on the data thus collected. The collected data is used exclusively for statistical purposes.

Does the website have third-party cookies?

Several external services save limited duration cookies on the user's computer. Some serve the normal functioning of certain features that make it easier for users to access content. These cookies are not set up by this website. The information on the protection of the data pertaining to our website only applies to our website; please note that the level and kind of data protection offered by external services needs to be checked on their official sites.

We currently allow:

Measurement of traffic

This website uses a service for measuring visitors' traffic, namely Google Analytics. No user identification is possible based on this data, which is collected and used for statistical purposes only. If you want to prevent the above-mentioned service from placing cookies, you can do it via the following link:

- Google Analytics - <https://tools.google.com/dlpage/gaoptout>

More information about turning off cookies

There are currently several useful websites if you wish to exclude placement of cookies of various services.
